In the Claims

Please amend the claims as follows.

(original) A method for controlling wireless network traffic, comprising: 1 1. determining when a roaming mobile station initiates a registration attempt with a 2 non-preferred network; and ٠3 causing the roaming mobile station to initiate a registration attempt with a 4 preferred network. 5 (original) The method of claim 1, further comprising determining what 2. 1 network the mobile station is currently registered with. 2 (original) The method of claim 1, further comprising preventing the 3. 1 mobile station from succeeding in the registration attempt with the non-preferred 2 3 network. (original) The method of claim 1, wherein the registration attempt with 1 4. the non-preferred network is completed, the method further comprising: 2 determining that the mobile station is registered with a non-preferred network; 3 and 4 periodically causing the mobile station to reinitiate a registration attempt with a 5 6 preferred network. (original) The method of claim 1, further comprising: 5. 1 determining whether the mobile station should be moved to another network; and 2 updating files on the mobile station, including a preferred provider list. 3 (original) The method of claim 1, further comprising: 1 6. determining whether the registration attempt with a non-preferred network is 2 allowed to succeed; 3 if the registration attempt is not allowed to succeed, rejecting the attempt. 4

- 7. (original) The method of claim 6, wherein rejecting the attempt comprises sending a recognized transaction to the mobile station that aborts the attempt.
- 8. (original) The method of claim 6, wherein rejecting the attempt comprises causing a transaction time out.
- 9. (original) The method of claim 6, wherein rejecting the attempt comprises modifying a message to restrict roaming by the mobile station.
- 1 10. (original) The method of claim 1, further comprising determining whether 2 a roaming mobile station is engaged in a voice or data session.
- 1 11. (original) The method of claim 1, further comprising determining whether 2 a roaming mobile station is in an automatic network selection mode or a manual network 3 selection mode.
- 1 12. (original) The method of claim 1, further comprising invoking an Update 2 Location message on demand.
- 1 Claims 13-25 (withdrawn)
